

## **Medications Information**

When coming to the Ranch we ask that you transfer all your prescribed medications to our pharmacy at:

Pharmasave  
250-1131 2<sup>nd</sup> Street North  
Cranbrook, B.C. V1C 3L1  
Tel: 250-417-0270

as our pharmacy dispenses your medications to maintain quality control and honour our licensing requirements.

Our Ranch physician can also be available for you to visit at the ranch every Tuesday and Thursday should the need arise or if you need to have your medications re-ordered. If you are unable to have your medication scripts transferred to our pharmacy, you will need to see our Ranch physician to assist you with this.

We ask that all clients bring 5 days' worth of prescribed medications to cover the time needed it takes to have your medications packaged. Please bring these medications in a medication vial that has a date, name of client, prescribing physician and updated medication with appropriate dosages and administration times.

We strongly discourage the use of Benzodiazepines (such as Ativan, Valium, etc.) or Opiates (such as Tylenol 3 or Percocets). We also recognize the difficulties in removing ourselves from these types of medications and are willing through our capable Ranch Physician and nursing staff to create safe and effective tapers during your stay.
